

Snowshoe Etiquette

- 1. Do not walk on groomed classic ski tracks set into the snow.
- 2. If the snowshoe trail crosses the ski trail, walk directly across and avoid stepping on the classic track.
- 3. Yield to skiers when crossing ski trails, they have the right of way.
- 4. Stay on the designated snowshoe trails. Do not wander off the trail as the tracks you leave may confuse other snowshoers.
- 5. Yield to the uphill snowshoer, just as you would when hiking.
- 6. Follow the 'Leave No Trace' principles take only pictures, leave only snowshoe footprints.
- 7. Leave Fido at home. Dogs are not allowed on the snowshoe trails.

Fat Biking Etiquette

- · Yield to all other users when riding.
- Slow down and look up-trail and yield to on-coming skiers when crossing a ski trail. Skiers don't have brakes but you do!
- When meeting a Snowshoer on the trail, step off your bike and allow them to pass
- Ride only on trails assigned for biking; check at the Chalet on which trail are open.
- Minimum tire tread width is 4". Fat Bikes Only No Mountain Bikes
- Keep tire pressure low 3-8 psig
- Allow the trail to set up for a few hours after grooming before you ride.
- If you need to walk up a hill, walk on the left side of the trail, with your bike on the right side. Save the right side for those that can ride it.
- Do not ride in or close to the classic ski tracks
- Do not use the ski trail as a group meeting area
- Dogs are not allowed on the trails.
- When is it too soft to ride?
 - As a general rule, if you have to get off and push your bike, the trail
 is too soft and you shouldn't be on the trails
 - If you are leaving a trough that is deeper than 1" or are having a hard time riding in a straight line, your tire pressure is too high or it is just too soft to be on the trails.
 - Be a good trail citizen and, if for some reason you leave ruts that will impact skiing negatively, please leave the trail. Also, please let the Chalet desk know so post the new trail conditions.
